

Gray Painting

Painting company in St. Louis, Missouri

“[Encore] has become a necessity in helping our business run smoothly.”

- Jennifer Schaub,
Office Manager

Profile

Gray Painting is a company in St. Louis that specializes in painting the interior and exterior of apartment buildings.

Challenges

Covering the St. Louis area and its buildings can be a challenge. In a city of three million people, the challenge was to keep everyone connected to run a smooth operation.

Solution

Gray Painting elected to use Actsoft's Encore software to keep its workforce in line and increase efficiency.

Benefits

Since using Encore, Gray Painting has seen its efficiency increase by as much as 50 percent and Jennifer Schaub, office manager, estimates her business has saved as much as \$1,000 a month.

“We use the timekeeping feature to capture worker time for payroll,” Schaub said. “We can track the closest painter to a job site with the GPS feature, and messaging is great for sending out mass messages to the field employees and their supervisors. We have more communication and uniformity amongst the company.”

Using Encore improved operations greatly for Gray Painting. The electronic timekeeping made it easier for them to manage their mobile employees and increase accountability throughout the company.

“The alert features are great for our supervisors to know what is going on in the field,” Schaub said. “[Encore] has become a necessity in helping our business run smoothly.”
