

## H. Christianson Trucking

A trucking and oil transportation company in Pollockville, Alberta

**“Yes, I would recommend Actsoft products, as they have helped us reduce costs and become more transparent to our clients.”**

**- Wes Mohl,**  
Operations Manager

### Profile

H. Christianson Trucking is a transportation company in Pollockville, Alberta. They provide transportation of oil and oil by-products to various locations within Western Canada.

### Challenges

For driver safety, they needed to know where every driver was at any point in time. They also needed to know locations and distances traveled for invoicing purposes. In order to invoice trips, they had to count the miles traveled, or map the route and use distance approximations. It was a very inaccurate and tedious process.

### Solution

Thanks to Encore, managers are able to invoice trips quicker and more accurately. They can use near real-time tracking to see driver locations at any moment, while also utilizing breadcrumb-trail technology to examine the exact routes drivers took for invoicing purposes.

### Benefits

According to Operations Manager Wes Mohl, Encore increased company efficiency by more than 30 percent. He said, “We are now able to accurately invoice the length of the trip and quickly identify if a trip is taking longer than it should.” Using Actsoft products saves H. Christianson Trucking over \$500 per month. Mohl thinks these services could benefit other businesses. “Yes, I would recommend Actsoft products, as they have helped us reduce costs and become more transparent to our clients.”
