

Oldenkamp Trucking, Inc.

A trucking company that specializes in cleaning-in-place services.

“We process payroll twice a month. Encore saves us so much time.”

- Oldenkamp Trucking Management

Profile

Based out of Bakersfield, Calif., Oldenkamp Trucking, Inc. has been in operation for about 24 years. The company employs a team of truck drivers and specializes in cleaning-in-place (C.I.P.) and Kosher C.I.P. services for tankers that are both with and without their own hookups.

Challenges

The company was looking for a way to reduce the amount of time it was taking to collect and process driver time for payroll compilation. Historically, it took an excessive amount of time to collect timesheets from employees and then aggregate all of the information into the payroll system. This resulted in unnecessary overtime being paid out by the employer just to compensate for the additional time.

Solution

Encore, with its Timekeeping functionality, was the clear-cut solution for Oldenkamp Trucking. Its functionality lets drivers in the field clock in and out for work — as well as record lunches and breaks — from their mobile devices. The information is automatically sent to the back office in near real-time.

Benefits

With Encore in place, Oldenkamp Trucking immediately began to notice a return on their investment. They estimate that efficiency was increased by approximately 30 percent. Now, instead of back-office employees having to manually collect paper timesheets from employees (which can lead to inaccuracies), they have a much more precise accounting of all hours clocked. This information is seamlessly curated into an easy-to-read report for review and then inputted into payroll for processing. Due to all the automation, overtime expenses for back-end employees were also reduced and the company sees anywhere from \$500–\$1,000 in decreased spending each month.
