

# Encore Vault

## Increased security for your sensitive data

Encore Vault provides organizations with all of the same core features of our standard solution, but with extra measures in place to further enhance data security.

Use Encore Vault to optimize your team's productivity, enhance communication, and improve customer service, all from an application that does even more to protect your valuable information. Plus, receive email alerts and schedule reports with access after an authenticated login.

- Hosted in the Microsoft Azure cloud with Azure Advanced Data Security
- Data encryption at rest and in transit
- HIPAA compliant to protect sensitive personal information
- Ongoing Encore staff training to ensure compliance
- Regular security scans and penetration tests
- Proactive 24/7 system monitoring
- Backed by local and geo-redundant databases for disaster recovery

### Encore Features

- Wireless Forms
- Timekeeping
- Job Dispatching
- Phone and Tablet GPS Tracking
- Vehicle and Asset Tracking

### Benefits

- Save time and money by eliminating paper-based processes
- Prevent issues and reduce errors caused by illegible handwriting, lost forms, and incorrectly entered information
- Improve communication, productivity, and efficiency with near real-time information
