

Barcode Scanning

Inventory management, simplified.

Encore's Barcode Scanning feature simplifies the process of inventory management. Keep better track of the supplies your business regularly uses by scanning barcodes and QR codes from the convenience of a mobile device camera.

Key Features

- **Scan both barcodes and QR codes using handset cameras.**
- Have employees scan forms of identification before they clock-in to work.
- Use barcode scans to verify that employees have completed any necessary job site protocols before finishing a workday.
- Attach scanned barcodes to digital documents, and submit them back to the office nearly instantly.

Key Benefits

- Save revenue by mobilizing your inventory management system.
- Required ID scans for clocked-in employees help to increase timesheet accuracy.
- Reduce the amount of equipment your team needs to complete its daily tasks.
- Identify and process any missing supplies faster than before.

Data is retained for one year. Additional retention may require added cost.
