

GPS Tracking

Maintain constant awareness of employee locations in near real-time through GPS Tracking. GPS locations increase overall workforce accountability and efficiency by providing the vital data of a worker's status. View where staff are on the live view map during working hours, and distribute orders accordingly by seeing which employees are closest to new jobs.

Key Features

- GPS Tracking can be used in tandem with Dispatching, allowing you to see the closest available workers to new job sites.
- Monitor the locations of remote employees, and verify that they're where they need to be during daily operations.
- Use geofences to track the entries and exits of work site perimeters by mobile staff.
- See your Encore solution's live map on the go, from the convenience of a handset's display using Manager App view.
- Adjust your device ping rates to track your vehicles and assets in a way that works best for your business.*

Key Benefits

- Establish accountability and transparency between managers and workers to boost productivity.
- Knowing the near real-time positions of your mobile employees improves workforce safety, whenever an emergency in the field may arise.
- Monitor employee activity patterns and workloads more efficiently.
- Streamline operations by rerouting team members to points of interest based on their proximity to them.
- Save time and money with a more effective solution for mobile workforce management.

**Available on Encore Vault only.*
