Encore Product Overview

Encore is a cloud-based solution providing the tools to help you effectively manage your entire mobile workforce from a single command center. Sporting a user-friendly, easy to implement platform, Encore allows your business to perform at its optimum level, regardless of your industry.

Does Your Business Face:

- Managers who struggle because they can't immediately access timesheets, orders or other forms?
- Confusion stemming from juggling multiple platforms used to track employees and assets?
- Mountains of paperwork resulting in issues like illegible handwriting or incorrect data entry?

Key Product Features

- **Timekeeping:** Eliminate unnecessary trips back to home base and free up more time for your employees to get things done. Time, date and location are captured and available at any time.
- **Dispatching:** Make work order information available in the blink of an eye via mobile phones or tablet devices. Create, send, and manage work orders from the office to the field, quickly and efficiently.
- **Forms:** Replace and enhance your paper forms with features like photo capture, built-in calculation tools, and emails for instant digital receipts. Customize prebuilt form templates to reduce errors and eliminate unnecessary printing to save money.
- **GPS Tracking:** Locate and monitor your fleet vehicles, employees, or assets in the blink of an eye. This available add-on helps with everything from route optimization to driver accountability.

Why Encore?

- Encore can streamline your business practices by automating and digitizing your current processes to reduce your overall labor expenses.
- Encore can minimize errors and help you complete jobs the right way the first time around for an improved customer experience.
- Utilize your smart devices to record what your employees work on, where they work, and how long they spend working.

- **Fleet:** Pinpoint your vehicles from any web browser with easy to install tracking devices. Potentially minimize vehicle loss and theft, since you always know where your vehicles are and when they are moving.
- **Assets:** Manage your assets with alerts and reports regarding their movement. GPS motion-based tracking technology on flexible and smart, battery operated devices helps you keep an eye on the assets and equipment you need to move your business forward.
- **Manager App:** Perform much of the same management functions as before, but without the need for a computer. Now, when you're on the road, you can use your mobile device to oversee your field workers' activities, dispatch new work orders, and more.
