Inventory Management

Smarter, cost-efficient inventory management that fosters growth

Gain more control over the way you manage inventory with Encore, our end-to-end workforce management solution. Better monitor internal asset health and stay up to date on regular inventory fluctuations to help manage costs while identifying areas of optimization within your business.

Control Costs
Reduce costs from asset loss.

Service Quality
Provide optimized service for customers.

Boost Accountability
Reduce theft and misuse of your assets.

Foster Growth
Position your company for long-term growth.

Features

• Digitize inventory management records and data with Wireless Forms for a more streamlined and cost-effective alternative to paperwork and manual processes.

• Use automatic barcode scanning and QR codes to make inventory management more seamless and less costly.

• Reduce human error and save time by efficient inventory control, which helps lead to increased customer satisfaction.

• Set alerts, schedule reports, and conduct immediate audits to make sure the supply side of your business is reaching its full potential.
